I just opened the game to see how it played and almost missed a plane flight. This game is beautiful, meditative and addicting. My island started with 5 species of plant and in 2 hours I had an insane grove of super varied flora. A lot of it was just combing plants to see what happened, but putting plants together to get a desired effect was often common sense and satisfying. Hats off to the developer, I don't know how he pulled that off.. So far I love this game so much! I'm glad I found it, there are just a few bugs here and there but so far it's great!! The one bug that really bothered me was the inability to pick flowers occasionally, I have to go to plant and click before going back to pick the flower.. I just opened the game to see how it played and almost missed a plane flight. This game is beautiful, meditative and addicting. My island started with 5 species of plant and in 2 hours I had an insane grove of super varied flora. A lot of it was just combing plants to see what happened, but putting plants together to get a desired effect was often common sense and satisfying. Hats off to the developer, I don't know how he pulled that off.. So far I love this game so much! I'm glad I found it, there are just a few bugs here and there but so far it's great!! The one bug that really bothered me was the inability to pick flowers occasionally, I have to go to plant and click before going back to pick the flower.

Mendel is a week old! : It's been a week since I released Mendel and I just wanted to say thank you to everyone that has bought, played, and reviewed the game. It's an amazing feeling to finally have this thing I've been working on for so long out in the world. Also, thank you to everyone that has sent me feedback as well as bugs they've found. I've been busy (making this game is something I do in my spare time) but I've had enough time to take care of most of them. Expect the first patch addressing at least some of the issues on Monday.. Patch 1.0.2 : It's been a while, but a few people have brought some issues to my attention that I wanted to address quickly. New option on pause menu: Inverted mouse look Bug & performance fixes: Performance with a large number of plants present has been improved Load times improved significantly. This should also solve the issue several people ran into where you could not load the game if the plants exceeded a certain number. Maximum number of plants that can be spawned while the game isn't running has been capped at 50 to prevent islands being totally overrun. Unfortunately I have still been unable to solve the bug where flower picking clicks occasionally do not register. It's been a bear.. Patch 1.0.1 : Mendel's first patch should be up and working for Mac and PC users. Just a few bug fixes and changes to mutation rates.
